Yes, we can provide the Tierra del Sol site raw pressure transducer data in Microsoft excel format. For the Tierra del Sol site there are 11 off-site private wells that are actively being monitored with pressure transducers. In addition, the Tierra del Sol site production well is actively being monitored with a pressure transducer (see attached).

For the Rugged site there are eight wells that are actively being monitored with pressure transducers (see attached).

Dudek will review the raw data from all wells and submit to the County shortly.

Cheers,
Trey

Jim and Trey,
Can we provide the raw transducer data for the Tierra del Sol site requested by Mr. Noland below?

Thanks,
Rob
